

Syllabus of Module

# 7. Project Legislation and Financial Management

## Lecturer: Ing. Martin Slažanský, Ph.D.

### Module Annotation

The module focuses on key legal, contractual and economic aspects of project management from the perspective of top management, statutory bodies and company owners. It covers the legal framework of projects, the preparation and negotiation of contractual relationships (e.g. contracts for work, licensing agreements and contracting), appropriate project governance, risk management and legal liability. In financial management, the module covers project cost planning and budgeting, evaluating the economic efficiency of investment projects, cost controlling, cash flow management and the specific aspects of project financing.

### Module Objective

The aim of the module is to balance the legal and financial security of projects and equip students with the knowledge required to manage the economic and legislative aspects of project proposals. Graduates will be able to assess project-related legal and contractual risks, establish cost and financial controlling, properly structure project budgets and cash flow, and evaluate the financial return and added value of investments in compliance with legislative requirements.

## Literature

1. Lecturer's original study text: Legislativní a finanční aspekty projektů v praxi – praktické podklady zaměřené na smluvní vztahy, řízení rozpočtu, cash flow a ekonomické vyhodnocování projektů na základě reálné praxe.

2. General study materials and legal framework: Methodological materials and recommended procedures for financial and cost controlling of projects. Relevant legislation governing contractual relationships in project management (e.g. contracts for work and licensing agreements under the Civil Code).
