

## MBA

# Project Management

**The MBA Project Management** will enable students to deepen their knowledge and skills in project management. Students will learn the principles of modern project management and learn how to properly plan, implement, complete and finally to predict the risks associated with the project.

Project management nowadays falls not only under industry or construction, but is also indispensable in services, public administration, IT and other sectors that are forced to respond to diverse changes in today's dynamic times. This forces companies and state-owned companies to respond to changing conditions. It is these changes that need to be adopted and managed as efficiently as possible, and project management is a suitable tool for the practical implementation of changes. A successfully run and implemented project has a positive impact on the performance of the entire organisation. In each module, students will be acquainted in detail with specific management activities that project management involves.

**The MBA Project Management** includes the following beyond the basic and optional modules: Project Management, Techniques, Methods and Tools of Project Planning and The Human Factor in Project Management.

## Modules of the specialization:

Management

Strategic Management

Financial Management

Marketing and Public Relations
