

## Syllabus of Module

# 8. Environmental Legislation and ISO Standards

**Lecturer: Mgr. Petr Kaňka**

### Module Annotation

The main role of enterprises in the market economy is to increase the value of the enterprise for owners. All departments of the company contribute to the achievement of this goal, one of which is the department of the environment and the management of the environmental impact of the organisation itself, both in terms of ensuring compliance with legislation and responding to stakeholders and investors or customers.

Environmental management has a number of tasks and challenges, which include:

- Compliance with legislation
- Reducing material costs, waste, emissions
- Ensuring communication with stakeholders
- Risk management, continuous improvement, control and operation management

### Module Objective

The aim of the module is to acquaint you with the essence of environmental management from the point of view of the company's ecologist or environmentalist. The completion of the module will provide the basis for the implementation of the processes, enabling the implementation of the ISO 14001 system in accordance with other systems of the organisation. The module contains topics such as necessary processes according to standards for quality management, occupational safety, energy management and EU and Czech legislation for compliance with legislation in industrial enterprises of all possible sectors.

## Literature

1. KRAUSE, Josef. Podniková environmentální strategie. Prague: Wolters Kluwer, 2019. ISBN 978-80-7598-560-6.

Unfortunately, all books and scripts published before 2015 are irrelevant to changes in standards and legislation and provide a maximum historical overview.
