

DBA Healthcare

Modules of the specialization:

Management vs. Leadership

Resource Management

Lean Management

Human Resource Management

Personal Development

Management

Quality Management in Healthcare

Crisis Management in Healthcare

Legislative Support and Grant

Procedures in Healthcare

The DBA Healthcare provides students with the most up-to-date information in the field of healthcare and deepens their previously acquired knowledge. The individual educational modules are designed in such a way that students acquire information from various areas of healthcare management and are able to connect them appropriately.

As part of the specialization, students will focus on the areas of crisis management, legal aspects and quality management in healthcare. In interactive workshops, lecturers will share practical advice on solving long-term strategies, introduce students to quality indicators in health care in general and within the legislative framework, and will also focus on ensuring the provision of health care in emergencies.

This specialization is intended primarily for senior management representatives working in the field of healthcare and healthcare organizations of all types of ownership. At the same time, it is suitable for managers or entrepreneurs in the pharmaceutical field.

The DBA Healthcare includes the following beyond the basic modules: Quality Management in Healthcare, Crisis Management in Healthcare and Legislative Support and Grant Procedures in Healthcare.
